

Multi-Spot™ Nd:YAG

With Multiple Sequential Pulsing Technology

Precise and comfortable treatment with 4 cooled and easily changed lightguides

1.5mm

2x4mm²

6mm

9mm

Long-Pulse Nd:YAG with multiple sequential pulsing

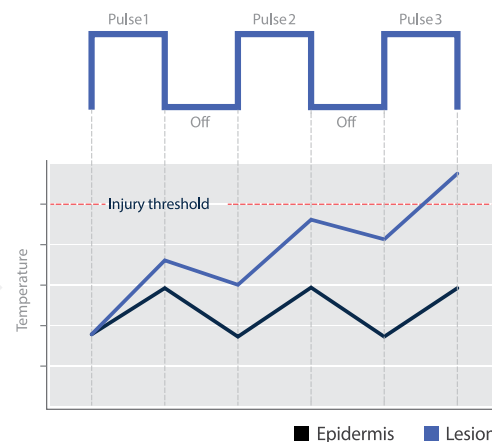

- Protects the epidermis, allowing the safe use of higher fluences
- Improves the efficacy in clearance of vascular lesions*

How it works:

Light energy is delivered during the pulses, and the tissue cools during the delays. More energy is safely delivered to the target.

What it does:

Multiple-Sequential Pulsing allows for cooling between pulses to safely remove hair on all skin types including darker skin and reduces the chance of skin damage in vascular lesion treatments.

Warnings and risks: M22™ Multi-Spot Nd:YAG is contraindicated for patients with active infection, viral, fungal or bacterial diseases. The use of M22 Nd:YAG could cause redness, swelling, scarring, change of pigmentation. See the system user manual for a complete list of contraindications and risks.

Specifications

Multi-Spot™ Nd:YAG	
Wavelength	1064 nm
Fluence	10-600 J/cm ²
Pulse Duration	2-20 ms
Pulse Delay	5-100 ms

Pulse Characteristic	Multiple Sequential Pulsing	
Repetition Rate	Up to 1 Hz	
Spot Size	6 mm; 2 x 4 mm ² ; 9 mm	1.5 mm
Cooling	Continuous contact cooling	Pre contact cooling
