

Reaching new heights with the V20 multi-technology platform

The demand for non-invasive aesthetic treatments is growing and today's customers are increasingly diligent in searching for the most effective solutions. Stay ahead of your competition by providing treatments with the most advanced technology available. The V20 Platform incorporates sophisticated PCR™ technology for light-based treatments and Viora's groundbreaking CORE RF technology within one system. This allows you to offer your clients the safest, most effective and efficient treatments on the market, with little to no downtime.

Viora's Commitment to Your Success

Viora is continuously developing new clinical protocols, sales and support tools that allow you to market your services to new and existing clients. We know that your success is our success and therefore Viora puts a high priority on your needs to ensure that you receive the best and fastest return on your investment.

Elevating Technology via Innovation

Viora's V20 full configuration gives you the technological breadth needed to perform the most requested aesthetic applications.

V·FORM

V·FORM with cutting-edge Multi-CORE technology

Deliver powerful contouring and cellulite reduction treatments with instant results, no downtime, and make a real difference to the lives of your patients. V·FORM utilizes Viora's proprietary Multi-CORE technology which splits RF energy into 3 dedicated channels to target specific skin layers depending on the symptoms. V·FORM is the perfect partner for your practice with full adjustability and complete customization of treatment parameters, allowing you to increase your treatment offerings while catering to patients of all ages and all skin types.

V·IPL

V·IPL with advanced PulseConfiguRythm™ (PCR™) technology

Viora's proprietary PCR™ technology is the driving force behind the V·IPL handpiece. This revolutionary, proprietary technology generates various pulse structures and provides adjustable pulse duration, ensuring that every skin type and condition can be treated. One handpiece and five interchangeable filters delivers the safest, most efficient IPL treatments. Contact cooling makes treatments safe and easily tolerated by your patients. With the most advanced and personalized treatments, Viora's V·IPL was designed with your patients in mind.

V·FR*

V·FR revolutionizes fractional treatments with SVC™ technology

The next generation of fractional treatments is due to Viora's innovative SVC™ technology in the V·FR handpiece. Switching, Vacuum and Cooling features make skin resurfacing and rejuvenation safe, effective, minimally-invasive procedures, with little downtime. Viora gives increased control, unprecedented penetration depth control, and allows you to determine the desired biological response. Choosing an ablative or coagulative response within one system provides you with a significant clinical advantage by customizing treatments per individual symptoms and per specific needs.

V·ST

Viora's groundbreaking CORE™ technology driving the V·ST

The advanced V·ST handpiece integrates Viora's proprietary and revolutionary multi-RF technology, CORE™. The ability to perform facial and body tightening with one handpiece is unique to Viora due to CORE's three frequency channels of different depth penetration, and a fourth channel incorporating all three frequencies. Combined with contact cooling, Viora's V·ST handpiece delivers the most comfortable, effective skin tightening treatments available.

Viora's Clinical Strengths for Best Outcomes

Viora's depth of clinical experience, attained by working with practitioners around the world, lets us develop special and unique combination protocols. With Viora's V20 multi-technology platform, you have the opportunity to capitalize on the most sought after treatments available today. This allows you to achieve efficacy of the highest standard.
